This, is, of course, a very careful, selection of what CBS deemed it could not avoid, of what it felt it caould handle best. Many major parts of the Report and the criticisms are entirely avoided - not even uncovered for a coat of whitewash.

One of these is the story of The False Oswald.

Another is the man in the doorway, on which they did work, made their own pictures and obtained those of others.

The pictures themselves is still another, especially the suppression of vital pictures. Of this they knew for they examined many in Dallas in the presence of a colleague following my leads on them. They thus became part of that suppression.

They learned of CBS pictures that the Commission, FBI and Secret Service didn't want and should have wanted, and of their own accidental destruction of their own pictures because there had been no federal interest and this happens in the normal course of TV useage.

They suppressed the suppression of the spectrographic analysis
